Once the domain of institutional and high-net-worth investors, alternative investments continue to grow in popularity and are making their way into the portfolios of retail (individual) investors. The term is a catchall for any assets that are bought and sold outside the major stock, bond, and commodity markets. Alternative investments can mean anything from investment-worthy antiques to bitcoins. It also covers undertakings like private equity deals and venture capital firms. Alternative investments have their allure, particularly to high-net-worth individuals who have a special interest (and expertise) in an esoteric subject and believe they can turn that interest into a valuable investment. Some can also offer tax benefits not available in traditional investments. Like any investment, the rate of return for alternatives is not guaranteed, but there is potential for it to be higher than that of traditional investments. Proponents of alternatives in the portfolios of individual investors maintain they now have access to sophisticated investments and potentially higher returns that until relatively recently were only available to institutions, such as pension funds and foundations.
